| (G) | 22° 22.656'N | 113° 54.961'E |

2. The works will be carried out from a flotilla of vessels including a dredger, a few derrick lighters, a flat top barge, some split hopper barges and tugs. The number of vessels engaged in the works will change from time to time to suit operational requirements.

3. A working area of approximately 50 metres will be established around the dredger and each derrick lighter. Yellow marker buoys fitted with yellow flashing lights will be laid to mark the positions of the anchors extending from the dredger and derrick lighters.

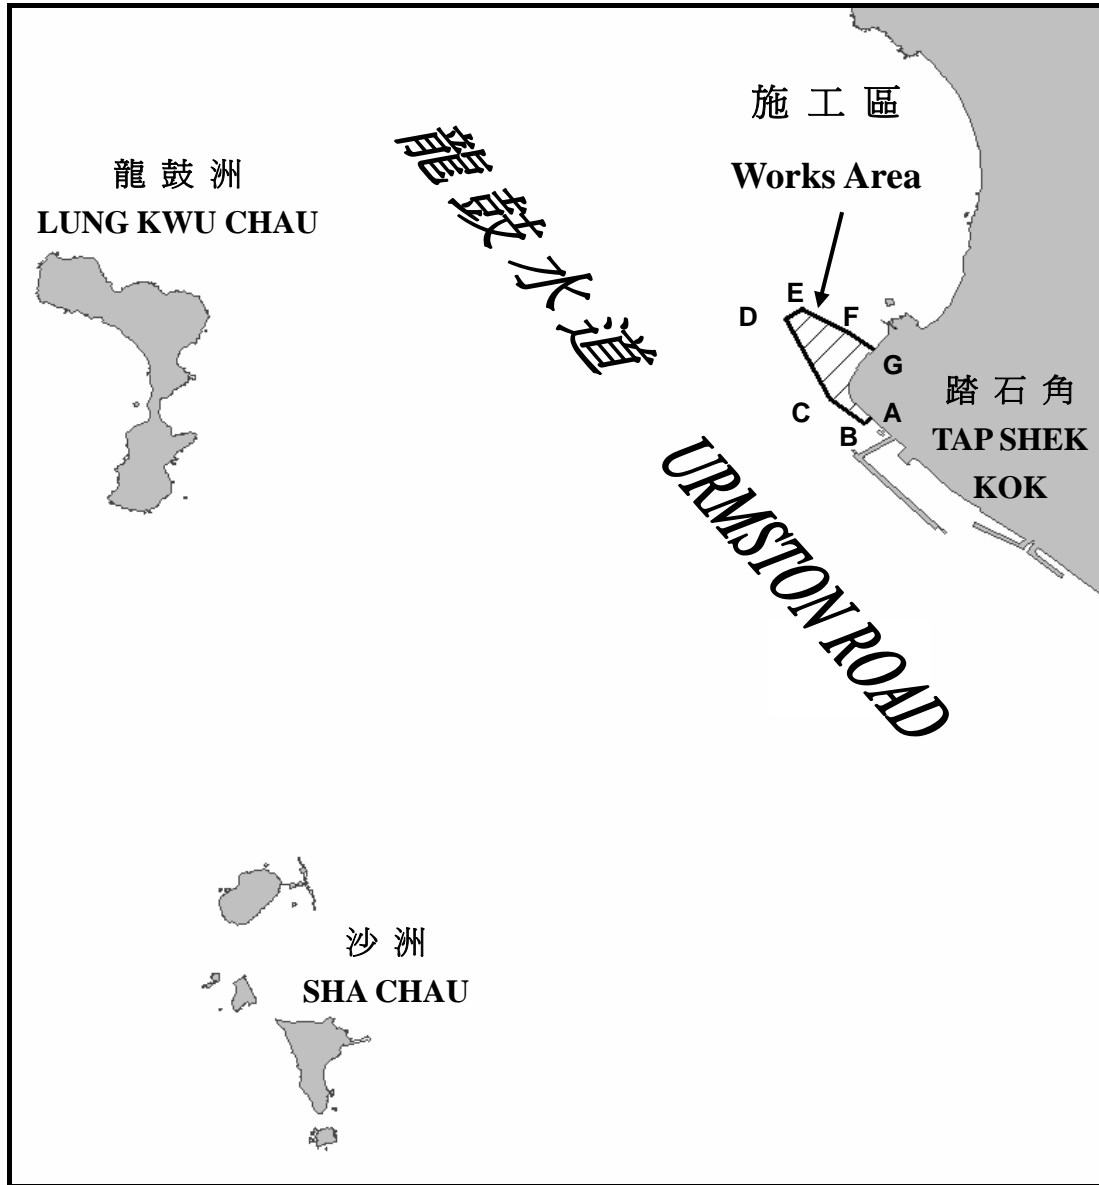

4. During the works period, several silt curtains will be established within the works area. The curtains will extend vertically from the sea surface to the seabed to enclose the pier. Each silt curtain is a large piece of netting used to contain mud and sediments. Small floating markers, yellow in colour and fitted with yellow flashing lights, will be laid to mark the extent of the silt curtains.
5. The works will be carried out round-the-clock.
6. Diving operations will be carried out from time to time during the hours of works.
7. Vessels engaged in the operations will display signals as prescribed in international and local regulations.
8. Vessels navigating in the vicinity should proceed with caution and keep clear at slow speed, bearing in mind there are divers working in the area.
9. A drawing showing the works area is attached to this Notice.
10. This Notice supersedes Marine Department Notice No. 31 of 2010.
